EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Adam Furst, Reg. No. 51,710 on 03/18/2005.

The application has been amended in the specification page 14 line 28 to page 15 line 3 to indicated the machine-readable medium is a tangible storage as follows:

In still other embodiments, ~~rather than providing the machine-readable medium~~ would be a fixed storage media, such as a magnetic-disk, information describing the above-described systems and methods. ~~can be provided using a communication system, such as a network or dedicated communication conduit. Accordingly, it should be appreciated that various programs, executable tiles or other information embodying the above-described systems and methods can be downloaded to a programmable device using any known or later developed communication technique.~~

2. Claims 1-4, 6-13, and 15-22 are allowed.
3. Claims 5 and 14 are cancelled.
4. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of a method for generating an electronic signal comprising: determining an update phase-angle; computing a first value of a cyclic function based on an interpolation using a set of data-values that describe the function and have a spacing expressed in terms of cycles, update phase-angle; and updating the electronic signal based on the first value as cited in independent claims 1, 10, 17, and 20.

The closest found prior art is Chrin (U.S. 4,577,287). Chrin discloses a method and apparatus for generating digital signals representing periodic samples of a sine wave comprising: determining an update phase-angle and update the signal based on a value. However, Chrin fails to disclose a computing a first value of a cyclic function based on an interpolation using a first set of data-values that generally describe the function and have a spacing expressed in terms of cycles as cited above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chat C. Do whose telephone number is (571) 272-3721. The examiner can normally be reached on M => F from 7:00 AM to 5:30 PM.
